

Centenary Celebration, 2024 Department of Ceramic Engineering, IIT (BHU), Varanasi - 221005, (UP), INDIA

About the Conference

To commemorate its Centenary Year in 2024 (CeraShatam 2024), the Department of Ceramic Engineering IIT(BHU) Varanasi is organizing an International Conference on Frontier in Ceramic Materials (ICFCM 2024) from 16th - 18th December 2024. This centenary conference provides a unique opportunity for all ceramists, materials scientists, academicians, and industry experts to connect and exchange ideas and knowledge with renowned scientists. We also aim to organize an alumni meeting on 16th December 2024, which will provide an opportunity for all of our alumni to meet, interact, and exchange ideas. It also provides an excellent platform for our alumni to refresh and rejoice in their golden memories.

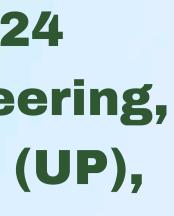

> About the Department

Within the IIT system, this department stands as the sole provider of degree courses in Ceramic Engineering. With a rich heritage spanning a century, it plays a pivotal role in advancing academic standards, fostering innovation, and nurturing fruitful collaborations with industries across the country. Currently, the Department offers a comprehensive range of programs including Bachelor of Technology, Integrated Dual Degree, Master of Technology, and Ph.D. programs, all specializing in Ceramic Engineering. Engaged in cutting-edge research, the Department actively explores emerging fields such as energy materials & devices, electrical & electronic ceramics, functional materials, glass & glass-ceramics, refractories & high-temperature ceramics, structural ceramics & composites, bioceramics, ceramic whitewares, and more, contributing significantly to advancing education and research.

> Themes for Conference

- Functional ceramics
- Biomaterials
- Materials for energy and environment
- Magnetic, spintronics and superconducting materials
- Electronic and electrical materials and devices
- Computational materials science

- Refractories temperature ceramics
- materials
- Glass and glass-ceramics

• Quantum materials and devices Ceramic additive manufacturing ultra-highand • Structural ceramics and composite
