VARANASI : Indian Institute of Technology, Banaras Hindu University (IIT-BHU) will be recognised as a collaborative research centre of Indian Pharmacopoeia Commission (IPC) of the Union Ministry of Health and Family Welfare.

A communication to this effect was received from the commission, said professor Sanjay Singh, head of department of pharmaceuticals engineering and technology. Dr GN Singh, secretary-cum-scientific director of the commission, informed about the development through a letter. Prof Singh said it was a matter of great joy that the IIT-BHU will be recognised as IPC's collaborating centre for pharmaceutical and

THE RECOGNITION WILL HELP PROMOTE QUALITY RESEARCH IN THE AREA OF PHARMACEUTICAL AND MEDICAL DEVICES.

medical devices quality and safety standard.

In this regard, a draft MoU by focusing the areas of mutual benefits will be shared with the institute. The recognition will help promote quality research in the area of pharmaceutical and medical devices. It would give a new exposure to the students in the field of research. IIT-BHU director PK Jain congratulated the department of pharmaceuticals engineering and technology teachers on the achievement.
