**VARANASI:** IIT-BHU director Pramod Kumar Jain has promised to provide single window system to the industries of the region for providing technical support to them.

Speaking in concluding session of institute, industry and society conclave, Jain said, "It is matter of great joy that a number of representatives from over a dozen types of industries such as agro, polymer, chemical, machine, tools and others attended the conclave. Through discussions, we tried to understand their technical needs."

It is matter of great joy that a number of representatives from over a dozen types of industries attended the conclave. Through discussions, we tried to understand their technical needs.

PRAMOD KUMAR JAIN, IIT-BHU director

The institute is having enough human and technical resources to complement the technical needs of these industries. To address this, a single window system will be created to help the stakeholders, Jain said.

Prof PK Mishra, who played a crucial role in organising the three-day event, said resources in the possession of IIT-BHU can

instantly be of help of the industries in Purvanchal.

RK Chaudhary of the Indian Industries Association expressed his desire for close connect between industries and the institute. Abdul Hadi Ansari, vice president of All India Carpet Manufacturing Association, requested for the technical help in the area of carpet washing.

Rajesh Bhatia of IIA Varanasi highlighted the immediate technical intervention in the area of packaging material after the ban on plastic. Around 65 industrialists from Varanasi Chandauli, Bhadohi and Mirzapur participated in the discussion on second day, Prof Mishra said. Joint commissioner industries Umesh Singh has stressed upon the need of collaboration between the institute and industry. Mishra said the participants working in the field of air, water pollution made request for development novel sensors and others disposal and management techniques. Few organisations need software application development.
